

To,

*The Admissions Teams,*

*It is with immense pleasure that I (Professor name) recommend my student Mr./Miss (name) for the Master's program in Engineering at your esteemed university. (Name) has been my student for the last (period of time) and in this time I have found them to be an exemplary student. I have taught them (name of subject) and found their performance to be more than satisfactory. They adopted a positive attitude towards learning, and their academic record is proof of this.*

*As their professor, I can assure you that [Student Name] will be great for your institute. I truly believe their skills are a perfect match for the aforementioned program. They are very motivated, determined, and strong-willed. [Student Name] is good at grasping new skills and concepts. Their knowledge of various engineering concepts is impressive. They are also an active member of the Student Committee of the college, serving as the [leadership position] faithfully. Their commitment to their interest in learning is commendable. They believe in uplifting the weaker sections of society.*

*[Student Name] has tutored underprivileged children in Math, Physics, and Chemistry for free for the last four years. They have successfully conducted a Book collection drive for underprivileged students for the last three years. I believe this program would greatly support them, and help them grow their career. I have seen them take on various challenges head-on. I remember they appeared for their third-semester exams despite suffering from [sickness]. Their perseverance and resilience are applaudable. They are a level-headed and practical person who is good at leadership roles.*

*I vouch for (name) in this letter recommending them to you. Accepting them into your institute will be the right choice as the institution would benefit from the value that they will add. I know that they will become an invaluable asset to your institution and the community.*

*Sincerely,*
