

To Whom This May Concern

My name is —— (Recommender's Name) and I am writing to offer my recommendation of —— (Candidate's full name) to whom I have personally known for —— (number of years or months) at —— (location). I understand that he is applying at _____ University for MS in Data Science.

During the course of my relationship with —— (candidate's name), I have observed that they show up earlier than asked, are team players, work hard, and carry out their work humbly and politely.

(Candidates name) has shown real promise in data science. Being a diligent student, especially in big data analytics. They understand how to use data in the real world. —— (Candidate's name) best quality is that they relentlessly focus on learning despite any hurdle or failure.

They have been one of the most valuable students in our University. Hence, without any reservation, I recommend —— (Candidate's full name) for this program at —— (University's name).

For any queries, you can contact me at-
